

HEADLIGHT CATALOG

J.W. SPEAKER BRINGS SCIENCE & DESIGN TOGETHER.

We view vehicle lighting from the perspective that matters most — Yours. Our engineers advance the science of light further each day to improve your safety. Our designers make vehicles look more beautiful from every point of view. You only get this unique mix of **science & design** from authentic J.W. Speaker products.

REGULATIONS

SURPASSING STANDARDS WORLDWIDE.

J.W. Speaker is committed to making the best products to be used legally on-road around the world. To do that, we design lights that meet and exceed the requirements for a variety of regulations:

The Federal Motor Vehicle Safety Standard regulates all automotive lighting, signaling, and reflective devices in the U.S.A. and is enforced by the Department of Transportation (**DOT**)

Many countries recognize the United Nations Economic Commission for Europe (**ECE**) Transport Division's regulations and mirror the ECE regulations in their own national requirements

SAE International develops standards for the engineering of powered vehicles mainly in the U.S.A. and Canada, including cars, trucks, boats, aircraft, and more

Transport Canada is responsible for developing regulations, policies, and services relating to transportation in Canada

The Australian Design Rules (**ADR**) are national standards for vehicle safety, anti-theft, and emissions

KEY TERMS

Daytime Running Light (DRL): Headlights that include DRL in their design will automatically switch on the daytime running lamp when the vehicle is moving forward, emitting a white light to increase the visibility of the vehicle during daylight conditions.

Front Position (FP): This part of a headlight provides added visibility of your vehicle to other drivers, particularly helpful for nighttime visibility while parked.

Left Hand Traffic (LHT): referring to which side of the road a driver uses. For instance, a driver in the UK is Left Hand Traffic and would use two LHT lights.

Right Hand Traffic (RHT): referring to which side of the road a driver uses. For instance, a driver in Canada is Right Hand Traffic would use two RHT lights.

LUMENS & BEAM PATTERNS

RAW LUMENS:

A measure of the **theoretical** output of a light

Calculated by multiplying the manufacturer’s lumen rating for the LED by the number of LEDs in the finished light

Does not represent the actual light output as it doesn’t account for thermal, assembly and optical losses that impact all lights

Example Calculation:

LED is rated at 100 Lumens

8 LEDs in the finished light

$100 \times 8 = 800$ Raw Lumens

EFFECTIVE LUMENS:

A measure of the **actual** output of a light

Measured using a photometric testing device for an exact measurement of a finished light for an accurate value of light output

Represents the actual light output of the finished light after thermal, assembly and optical losses

Example Measurement:

Raw Lumens = 800

Losses = ~40% of Raw Lumens ($800 \times .4 = 320$)

$800 - 320 = 480$ Effective Lumens

J.W. Speaker uses photometric testing devices and optical engineers to measure the Effective Lumens of our products to give you accurate light output values.

BEAM PATTERNS

Each light pattern is designed and tested by optical engineers to give you the best possible beam pattern to drive behind.

Below are examples of the common beam patterns.

Our engineers design each product to project light in the areas you need it **and** comply with the legal requirements for on-road use in the countries the product is intended to be used in.

PARTS OF A LIGHT DIAGRAM

Lux Key¹: Intensity of the light measured

Title²: The type of beam pattern, and the height and angle of the light when it was measured

Light Pattern³: A “bird’s eye view” showing the shape, intensity, and distance

Distance Markers⁴: Reference in meters (m) for the size and distance of the light pattern

COLOR TEMPERATURE & IP RATINGS

Measured in degrees Kelvin, color temperature describes how cool or warm the light emitted by a source is. Any object will emit light if it is heated to a high enough temperature. The color of the light will change in a predictable way as the temperature increases, shown on the Kelvin Scale.

Warm: 0 to 3,000K

- Used in living spaces or retail stores
- Similar to the rising and setting sun
- Can fatigue eyes and make people feel tired

Neutral White: 3,500 to 4,900K

- Used in bathrooms, offices, classrooms & malls
- Clean and neutral lighting that is inviting
- Promotes efficiency and similar to daylight

Cool: 5,000-7,000K

- Used in hospitals, manufacturing, & construction areas
- Promotes alertness and attention to detail
- Mimics daylight and makes people feel more awake

J.W. Speaker uses LEDs and designs lights with a color temperature of 5,000K to give drivers crisp, white light for the best visibility, and to promote alertness and safety.

Color temperature does not measure or indicate the physical heat coming from a light source.

IP RATINGS

The Ingress Protection (IP) Code outlines a system of classification for the protection of electrical enclosures against the intrusion of foreign bodies like tools, fingers, dust, and moisture. The system of classification was specified by the International Electrotechnical Commission and is officially designated as IEC 60529.

FIRST # - DEGREE OF INGRESS PROTECTION

The degree of protection against contact with moving parts and the degree that the equipment is protected against solid foreign bodies intruding into an enclosure.

IP #	DESCRIPTION
0	No protection provided.
1	Protection against entry of objects larger than 50 square mm.
2	Protection against entry of objects larger than 12 square mm.
3	Protection against entry of objects larger than 2.5 square mm.
4	Protection against entry of objects larger than 1.0 square mm.
5	Protection against entry of dust in sufficient quantity to prevent satisfactory operation.
6	Complete protection against entry dust.

SECOND # - DEGREE OF MOISTURE PROTECTION

The degree of protection for the equipment inside the enclosure against the harmful entry of various forms of moisture (e.g. dripping, spraying, submersion, etc.)

IP #	DESCRIPTION
0	No protection provided.
1	Protection against drops of water falling vertically.
2	Protection against drops of water falling vertically when the light assembly is tilted up to 15 degrees from its normal position.
3	Protection from entry of water spray from angle of up to 60 degrees from vertical.
4	Protection from entry of water splashes or spray from any direction.
5	Protection from a low pressure jet of water in any direction.
6	Protection against heavy seas or a strong jet of water in any direction.
7	Protection against immersion up to 1 meter.
8	Protection against submersion over 1 meter.

Escape the standard.

Introducing the latest technology in lighting for Jeep® Wranglers. The EVO J3 is the first street-legal, plug & play Jeep headlight with a built-in turn signal. Powerful LEDs and carefully engineered light patterns give you the best performance and design available whether on the road or exploring off-road.

Light your adventure all year round.

The heated version of the EVO J3 features SmartHeat® technology to de-ice lenses for the best safety and visibility.

Customizing & control at your fingertips.

Unlock more control and features in the EVO J3 using the new **J-Link™ mobile app**. Customize your startup sequence, access the Off-Road Mode and lead the trail with Guide Mode.

PRODUCT SPECIFICATIONS

- Raw Lumen Output:**
3,600 (High Beam); 3,020 (Low Beam)
- Effective Lumen Output:**
1,320 (High Beam); 1,201 (Low Beam)

PART #	DESCRIPTION
0543591	Driving
0548631	Spot
0549691	SAE/ECE/Fog

MODEL 8630 & 8631 EVOLUTION

PRODUCT SPECIFICATIONS

Raw Lumen Output:
2,925 (High Beam); 2,025 (Low Beam)

Effective Lumen Output:
1,000 (High Beam); 630 (Low Beam)

Candela Output:
61,684 (High Beam); 19,162 (Low Beam)

Connector/Wiring:
Integral Connector in Housing simulating
Delphi #12124107

Operating Voltage:
10-32V DC

Current Draw:
Low Beam: 2.20A @12V; 1.70A @14V; 1.10A @24V
High Beam: 3.50A @12V; 2.70A @14V; 1.70A @24V
Turn: 1.40A @12V; .70A @24V
8630 FP: .09A @12V; .07A @14V; .04A @24V
8630 DRL: .90A @12V; .68A @14V; .38A @24V
8631 FP: .05A @12V; .05A @24V
8631 DRL: 1.10A @12V; .70A @24V

Retrofit Information:
5.75" Round (PAR46)

Standards:

MODEL 8630

PART #	DESCRIPTION
0549911	DOT/ECE/RHT/High/Low/FP & DRL
0549921	ECE/LHT/High/Low/FP & DRL
0550921	DOT/High/Low

PART # ACCESSORIES

3157751	Double Lamp Mounting Ring Kit
8200001	Single Lamp Mounting Ring Kit

MODEL 8631

PART #	DESCRIPTION
0551641	ECE/LHT/High/Low/Turn/FP & DRL
0551631	DOT/ECE/RHT/High/Low/Turn/FP & DRL

If your vehicle is operated in the United States you do NOT need to connect the Front Position wire (red) unless your vehicle is equipped with a front position light.

MODEL 8632 EVOLUTION

PRODUCT SPECIFICATIONS

Raw Lumen Output:
2,925 (High Beam); 2,025 (Low Beam)

Effective Lumen Output:
1,000 (High Beam); 630 (Low Beam)

Connector/Wiring:
Integral Connector in housing simulating
Delphi 12124107

Operating Voltage:
10-32V DC

Current Draw:
High Beam: 3.67A @ 12V; 1.83A @ 24V DC
Low Beam: 2.5A @ 12V; 1.25A @ 24V DC
DRL: 0.067A @ 12V; 0.34A @ 24V DC
Front Turn: 0.83A @ 12V; 0.42A @ 24V DC
Front Position: 0.08A @ 12V; 0.042A @ 24V DC
Side Marker: 0.08A @ 12V; 0.042A @ 24V DC

Retrofit Information:
5.75" Round (PAR46) Pedestal Lights

Standards:

PART #	DESCRIPTION
0551983	DOT/ECE/RHT/High/Low/Turn/FP & DRL/Kit of 2
0551561	DOT/ECE/RHT/High/Low/Turn/FP & DRL - RH Lamp
0551571	DOT/ECE/RHT/High/Low/Turn/FP & DRL - LH Lamp
0551973	ECE/LHT/High/Low/Turn/FP & DRL/Kit of 2
0551991	ECE/LHT/High/Low/Turn/FP & DRL - RH Lamp
0552001	ECE/LHT/High/Low/Turn/FP & DRL - LH Lamp

*RH & LH refer to right hand and left hand lamps on the vehicle.

If your vehicle is operated in the United States you do NOT need to connect the Front Position wire (red) unless your vehicle is equipped with a front position light.

8700 EVO 2 DUAL BURN

PRODUCT SPECIFICATIONS

Raw Lumen Output:
3,200 (High Beam); 1,770 (Low Beam)

Effective Lumen Output:
1,260 (High Beam); 750 (Low Beam)

Candela Output:
71,500 (High Beam); 35,003 (Low Beam)

Connector/Wiring:
H4

Operating Voltage:
9-32V DC

Current Draw:
Heated High Beam: 4.20A @ 12V; 2.30A @ 24V DC
High Beam: 3.50A @ 12V; 1.80A @ 24V DC
Low Beam: 2.00A @ 12V; 1.10A @ 24V DC
Front Position: 0.16A @ 12V; 0.10A @ 24V DC
DRL: 1.60A @ 12V; 0.80A @ 24V DC

Retrofit Information:
7" Round (PAR56)

Standards:

If your vehicle is operated in the United States you do NOT need to connect the Front Position wire (red) unless your vehicle is equipped with a front position light.

DON'T LET SNOW AND ICE SLOW YOU DOWN.

Winter weather can cause snow and ice build up on the outside of lights, reducing visibility. This creates a dangerous situation not only for you, but to others as well.

J.W. Speaker's series of heated LED lights with SmartHeat® is redefining lighting with its integrated lens heater technology. Each light is designed to automatically de-ice the surface of the lens. Products with SmartHeat provide peace of mind during cold and snowy conditions by maintaining your ability to see, and to be seen by other drivers.

SmartHeat Technology uses an internal sensor for air and light temperature and automatically turns the heater on and off as needed.

		Light Temperature		
				
Air Temperature		ON	ON	OFF
		ON	OFF	OFF
		OFF	OFF	OFF

A LEGACY OF INNOVATION

OEM ORIGINS

1935

J.W. Speaker Corporation founded by John W. Speaker to manufacture tube & tire repair products

1940S

Supplied the U.S. Military during World War II, including compact folding stoves and tire repair products; Designed & patented the iconic P-38 can openers and Heatab dry fuel.

After the war, shifted focus to manufacturing mirrors and lighting products for trucks and cars.

1960S

John W. Speaker unexpectedly passed away and his son, Jack, became President.

Expanded into lighting on original equipment manufacturing (OEM) for lawn & garden and golf & turf tractors.

1980S

Tim & Jamie Speaker, grandsons of the founder John W. Speaker, formally join the company and became Co-Presidents.

J.W. Speaker became solely focused on vehicle lighting, growing the business with custom designed lighting for agriculture OEM customers

1990S

Production on first custom headlamp for Arctic Cat snowmobile began, pushing into the power sport market.

Partnerships with premier OEM customers like Harley-Davidson, U.S. military, and development on custom lighting products began.

AND AFTERMARKET GROWTH

First LED light with solid optic technology designed, providing a pathway for future product development

2000S

International expansion and growing portfolio of OEM products in the industrial, mining, power sport, and construction markets

Harnessed experience from OEM products and entered the aftermarket with the first-of its-kind 7" round LED headlight for Jeeps

2012

Established distribution channels and expanded the company product portfolio into the aftermarket

Launched the world's first Adaptive Motorcycle Headlight™ with technology that automatically fills dark areas of the road when cornering on a bike

2015

SmartHeat® technology launched in headlights and work lights with integrated lens technology to de-ice lenses, to improve driver visibility & safety

2017

Released Evo J3™ headlight and Trail 6™ off-road light, both compatible with new J-Link™ mobile app, giving drivers control and customization options for their lights

2019

MODEL 93M

3,520 (High Beam); 2,120 (Low Beam)

Effective Lumen Output:
1,600 (High Beam); 1,050 (Low Beam)

Candela Output:
60,000 (High Beam); 8,300 (Low Beam)

Connector/Wiring:
H4

Operating Voltage:
9-16V DC

Current Draw:
Low Beam: 1.9A @ 12V DC
High Beam: 3.2A @ 12V DC
Front Position: 0.21A @ 12V DC
Low Beam at Full Lean: 4.2A @ 12V DC
High Beam at Full Lean: 5.5A @ 12V DC

Retrofit Information:
5.75" Round (PAR46)

Standards:

ADAPTIVE

PART #	BEZEL	DESCRIPTION
0555091	Black	DOT/ECE/High/Low
0555101	Chrome	DOT/ECE/High/Low

OEM

Technology is constantly evolving. Our attitude towards design remains constant. Relentless innovation and smart partnerships make J.W. Speaker the reliable partner who invests in the design and science of vehicle lighting.

AFTERMARKET

Look good or drive safely. That's often your choice with Aftermarket lights, but J.W. Speaker does not compromise. Our engineers and designers don't cut corners. The result is power and beauty that makes you feel good about the look of your vehicle — and your safety.

Family owned and operated since 1935.

We proudly design and engineer the best LED lighting products, all in Germantown, WI, U.S.A.
